I like to think of myself as a person who likes to be challenged. All different experiences while working in countries such as the UK, Spain, Monaco or Saudi Arabia shaped me to become who I am today.

In my last mission, I have been working for the European Committee of the Regions as a UX/UI Designer (User Experience / User Interface). I meet client users often to understand their way of working and explain my design proposal as a solution to help them improve their day to day work on the platform. Digital oriented, I take a special interest in the mobile or tablet interface during the process of the design thinking. I'm a very skilled UI designer of content management web applications including integration of dynamic web applications. My overall objective is to analyse, develop and improve web projects. I am also good in understanding the user needs and providing them with a design to match their expectations.

I am skilled in the Adobe package, and as a professional front-end designer, I also have a very strong knowledge of HTML, CSS, JavaScript, WordPress and Bootstrap. I am a user oriented team player, with a pro-active attitude.

Education and Experiences

Graphic Designer

1

RMC Sport

- Digital sport news paper
 - Press Article layout / First Page
 - Graphic Sport Result
 - Ps / Ai
- 1,5 year**

Webmaster and Communication Manager
